How hard was it learning to speak
your home language?

Eeeeasy . . .

How hard is it learning to
speak a second language?

Uuurghhh . . .

Finance is EASY!

You just never learn to speak it when you were growing up

INVITATION

to be in the

PRESENT

MOMENT

WHAT

is

Accounting?

How would you sort out these messes?

1: Group stuff

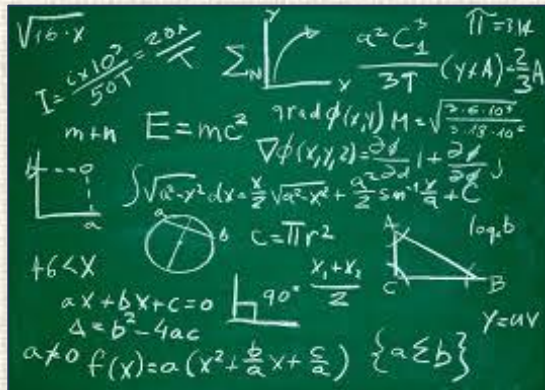

2: Put into “containers”

Accounting is exactly the same...

It is just a
“glorified filing system”

It is built on a
disarmingly simple LOGIC
and has NOTHING
to do with
MATHS or NUMBERS

So it's completely irrelevant if you
struggle with Maths, or are great at Maths

In the beginning.....

Kushim's tablet: 3400 – 3000 BC

1. When did humans start trading?

2. And when did humans start keeping written Financial Records?

In the beginning.....

The earliest known recorded name of a person in writing, "Kushim", appears on clay tablets from the Uruk period (3400 – 3000 BC). The tablets were used to record barley transactions and are written in the archaic Sumerian pictographic script called Uruk III. The tablets contain pictograms that represent: A sheaf of barley, a brick building with a chimney, a sheaf inside a vessel, and dots and lines that represent numbers.

Kushim's tablet: 3400 – 3000 BC

1. When did humans start trading?

2. And when did humans start keeping written Financial Records?

The breakthrough INNOVATION
- and unchallenged success -
of the

DOUBLE-ENTRY ACCOUNTING FILING SYSTEM

(invented about only 600 years ago)

is that it enables us to keep track of

TWO Fundamental Financial Stories at the same time....

**Spoiler Alert! It's NOT the
Balance Sheet and Income Statement**

Think of it like a COIN

2. Three equations explain how these elements relate to each other:

Assets = Liabilities + Equity

Equity = Capital + Profit

Profit = Income - Expenses

What makes a **NUMBER** a Number and not a **LETTER** ?

“Category Formation”

is one of our brain's

8 Core Cognitive Capacities

1. It is the ability to organise information, concepts and skills into categories, and
2. Forms the cognitive basis for higher-level abilities like applying, analysing, and evaluating those concepts and skills.

OMG!

What if the difficulty so many people experience with **Finance** and **Accounting** is rooted in a **CATEGORISATION** problem ??

Categories are the basis of language and organisation of the world

The Logic of Accounting

Key Learnings

1. The FIVE ELEMENTS of Accounting

Assets, Liabilities, Equity, Income, Expenses

2. Three equations explain how these elements relate to each other:

$$\text{Assets} = \text{Liabilities} + \text{Equity}$$

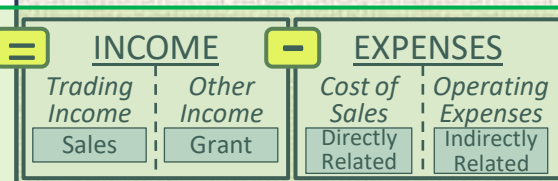

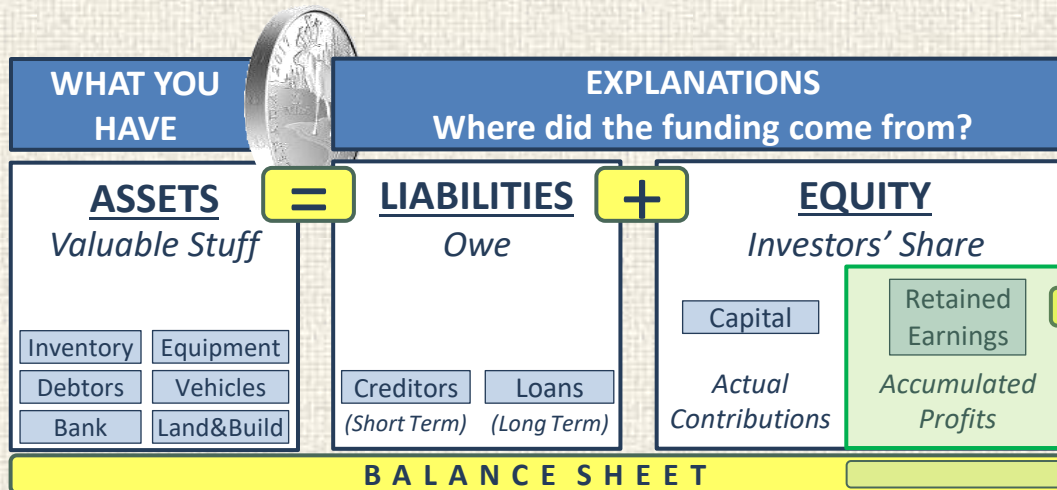

$$\text{Equity} = \text{Capital} + \text{Profit}$$

$$\text{Profit} = \text{Income} - \text{Expenses}$$

3. Transactions have at least 2 effects

***Single effect**

DISCUSS:

Consider the number of **effects** a single transaction can have on our Accounting System

BALANCE SHEET				INCOME STATEMENT			
1 Brother invests	Bank ↑			Capital ↑	No		
2 Aunty Loan (2,000)	Bank ↑	Loan ↑			No		
3 Buy truck	Bank ↓ Vehicles ↑				No		
4 Move some furniture	Bank ↑				↑	Sales ↑	
5 Buy fuel	Bank ↓				↓		Fuel ↑
6 Loan repayment	Bank ↓	Loan ↓			No		
7 Swap debt for equity		Loan ↓		Capital ↑	No		
8 Pay dividend	Bank ↓				Dividends ↓		

1 How many **effects** were there for each of our 8 example transactions?

TWO

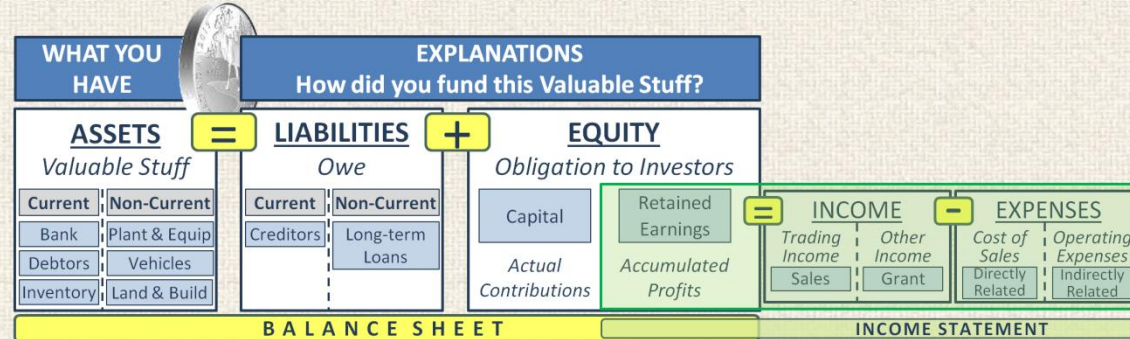

2 Could it be possible to have **only ONE effect** for a single transaction?

IMPOSSIBLE

3 Could it be possible to have **more than TWO effects** for a single transaction?

ABSOLUTELY

Key Learnings

1. The FIVE ELEMENTS of Accounting

Assets, Liabilities, Equity, Income, Expenses

2. Three equations explain how these elements relate to each other:

Assets = Liabilities + Equity

$$\text{Equity} = \text{Capital} + \text{Profit}$$

$$\text{Profit} = \text{Income} - \text{Expenses}$$

3. Transactions have at least 2 effects

1	Brother invests	Bank	↑			Capital	↑	No				
2	Aunty Loan (2,000)	Bank	↑	Loan	↑			No				
3	Buy truck	Bank ↓ Vehicles.	↑					No				
4	Move some furniture	Bank	↑					↑	← Sales	↑		
5	Buy fuel	Bank	↓					↓	←			Fuel
6	Loan repayment	Bank	↓	Loan	↓			No				
7	Swap debt for equity			Loan	↓	Capital	↑	No				
8	Pay dividend	Bank	↓					Dividends	↓			

Many possible effects, but always one of 4 patterns:
Identify the transactions where . . .

1		
2	 	No Change
3		
4	No Change	 

1. Both sides of the coin go *up*

2. Only the **assets** side goes *up* and *down*

3. Both sides of the coin go *down*

4. Only the **explanations** side goes *up* and *down*

The Logic of Accounting

6	Loan repayment	Bank	↓		Loan	↓	
7	Swap debt for equity				Loan	↓	Capital ↑
8	Pay dividend	Bank	↓				Dividend ↓

1	↑		↑
2	↓ ↑		No Change
3	↓		↓
4	No Change		↓ ↑

Key Learnings

- The FIVE ELEMENTS of Accounting**
Assets, Liabilities, Equity, Income, Expenses
- Three equations** explain how these elements relate to each other:

$$\text{Assets} = \text{Liabilities} + \text{Equity}$$

$$\text{Equity} = \text{Capital} + \text{Profit}$$

$$\text{Profit} = \text{Income} - \text{Expenses}$$
- Transactions have at least 2 effects
- Transactions always conform to one of 4 patterns
- There will ALWAYS be a common-sense way to place the 2+ effects of every single financial transaction, into 1 or more of the 5 containers, with the unavoidable outcome that the 2 sides remain equal

"There has been no need to mention Debits and Credits!!"

How
does a business
make money?

Value-Creation: Overview

The diagram illustrates the accounting equation and its components. At the top, a blue bar contains the text "WHAT YOU HAVE" on the left and "EXPLANATIONS" in the center, with the subtitle "How did you fund the Valuable Stuff?". Below this, the equation is shown as **ASSETS** = **LIABILITIES** + **EQUITY**. A coin is placed over the equals sign. Under **ASSETS** (labeled "Valuable Stuff"), there are two columns: "Current" (Inventory / Stock, Debtors (A/R), Cash & Cash Equ.) and "Non-Current" (Plant & Equip., Vehicles, Land & Buildings). Under **LIABILITIES** (labeled "Owe"), there are two columns: "Current" (Creditors (A/P)) and "Non-Current" (Long-term Loans). Under **EQUITY** (labeled "Obligation to Investors"), there are two columns: "Capital" (Actual Contributions) and "Retained Earnings" (Accumulated Profits (less Dividends)). A red box highlights the "Retained Earnings" section, which is further broken down into "INCOME" (Trading Income, Other Income) and "EXPENSES" (Cost of Sales, Operating Expenses). The entire diagram is labeled "BALANCE SHEET" at the bottom left and "INCOME STATEMENT" at the bottom right.

2

How

does a business
make money?

PROFIT

How is this calculated?

Income - Expenses

Where is this Reported?

Income Statement

What are the 3 layers of Profit in the Income Statement?

	Sales	100
less	Cost of Sales	40
=	Gross Profit	60
less	Operating Expenses	25
=	Operating Profit	35
less	Income Tax (20%)	7
=	Net Profit	28

Value-Creation: Overview

INCOME STATEMENT

RETURN ON INVESTMENT

What does "ROI" mean?

It's a broad, generic term

What is the narrower term when we apply "ROI" to a business?

We replace "Return on *Investment*" with "Return on *Equity*"

What does "Return" mean?

Net Profit, always for a full Year

So "Return on Equity" is then

Net Profit
Equity

Exercise: Calculate RoE if Net profit is 50,000, and Equity is 250,000

50,000
250,000

=

20%

Sales	100
less Cost of Sales	40
= Gross Profit	<u>60</u>
less Operating Expenses	25
= Operating Profit	<u>35</u>
less Income Tax (20%)	7
= Net Profit	<u>28</u>

Architecture: The deeper layer of *how* the business makes money

The numbers are *what* it makes

2 How does a business make money?

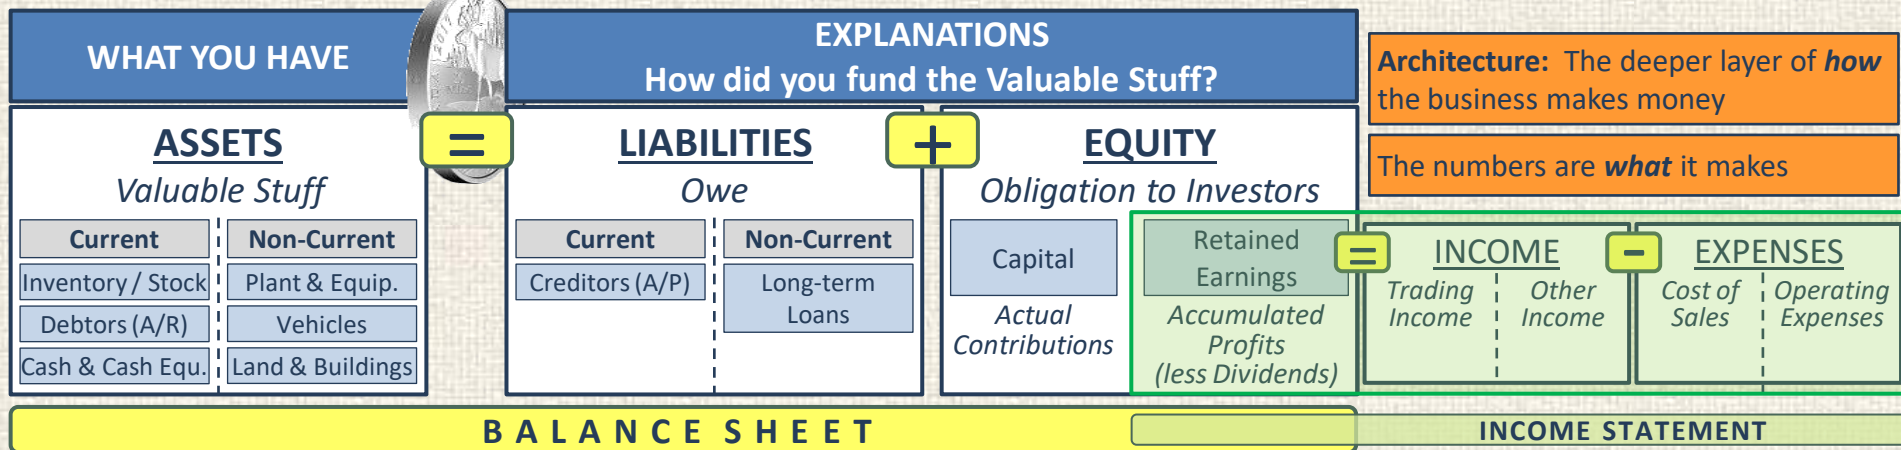

PROFITABILITY

- We've seen these *numbers* before
- How do we *compare* ourselves?
Express the numbers as a %
- Architecture change over time?
- Architectures in an *INDUSTRY*?
- Unless . . . ?
*D for . . . **DISRUPTION***

PLANNING: Architecture 1st; then *Numbers*

	Number	I/S Architecture	
Sales	100		
less CoS	40		
= GP	<u>60</u>	<u>60%</u>	Gross Profit Sales GP Margin or %
less "Opex"	25		
= OP	<u>35</u>	<u>35%</u>	Op. Profit Sales Op. Margin or %
Less Tax (20%)	7		
= NP	<u><u>28</u></u>	<u><u>28%</u></u>	Net Profit Sales NP Margin or %

Value-Creation: Detail

Architecture: The deeper layer of *how* the business makes money

The numbers are *what* it makes

PROFITABILITY

Exercise:

Examine the reported numbers for period 1 and 2 and prepare your comments for your Board Meeting tomorrow

	Period1	Period 2
Sales	100	200
CoS	40	100
GP	60 60%	100 50%

Sales and GP NUMBERS are much higher, but....

GP% is significantly lower

What could the reasons be?

2 How does a business make money?

The Logic of Accounting

The Language of Finance: Overview

The Logic of Accounting

1 Coin - 2 Stories

1 Brother invests	Bank ↑		Capital ↑	No				
2 Aunty Loan (2,000)	Bank ↑	Loan ↑		No				
3 Buy truck	Bank ↓ Vehicles ↑			No				
4 Move some furniture	Bank ↑			↑	Sales ↑			
5 Buy fuel	Bank ↓			↓			Fuel ↑	
6 Loan repayment	Bank ↓	Loan ↓		No				
7 Swap debt for equity		Loan ↓	Capital ↑	No				
8 Pay dividend	Bank ↓		Dividends ↓					

1	↑	↑
2	↓ ↑	No Change
3	↓	↓
4	No Change	↓ ↑

Key Learnings

1. The FIVE ELEMENTS of Accounting

Assets, Liabilities, Equity, Income, Expenses

2. Three equations explain how these elements relate to each other:

$$\text{Assets} = \text{Liabilities} + \text{Equity}$$

$$\text{Equity} = \text{Capital} + \text{Profit}$$

$$\text{Profit} = \text{Income} - \text{Expenses}$$

3. Transactions have at least 2 effects

4. Transactions always conform to one of 4 patterns

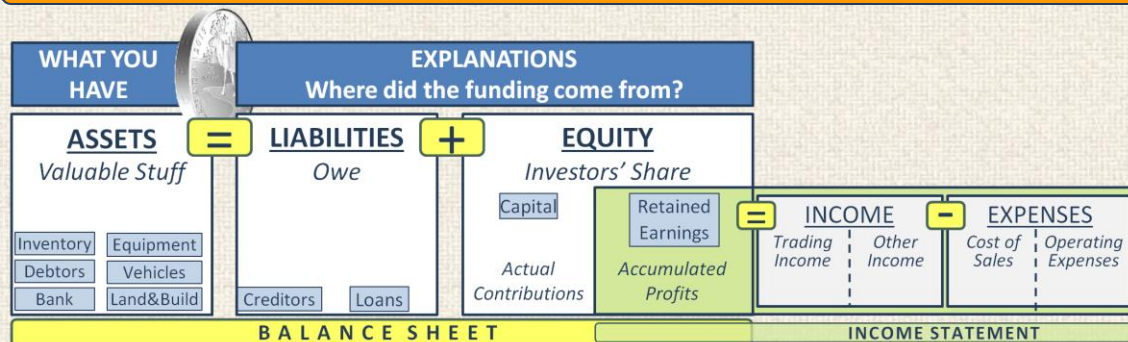

5. There will ALWAYS be a common-sense way to place the 2+ effects of every single financial transaction, into 1 or more of the 5 containers, with the unavoidable outcome that the 2 sides remain equal

"There has been no need to mention Debits and Credits!!"

The Debits and Credits System

1 Coin - 2 Stories

1 Brother invests	Bank ↑		Capital ↑	No				
2 Aunty Loan (2,000)	Bank ↑	Loan ↑		No				
3 Buy truck	Bank ↓ Vehicles ↑			No				
4 Move some furniture	Bank ↑			↑	Sales ↑			
5 Buy fuel	Bank ↓			↓			Fuel ↑	
6 Loan repayment	Bank ↓	Loan ↓		No				
7 Swap debt for equity		Loan ↓	Capital ↑	No				
8 Pay dividend	Bank ↓		Dividends ↓					

1	↑	↑
2	↓ ↑	No Change
3	↓	↓
4	No Change	↓ ↑

Key Learnings

1. The FIVE ELEMENTS of Accounting
Assets, Liabilities, Equity, Income, Expenses

2. Three equations explain how these elements relate to each other:

$$\text{Assets} = \text{Liabilities} + \text{Equity}$$

$$\text{Equity} = \text{Capital} + \text{Profit}$$

$$\text{Profit} = \text{Income} - \text{Expenses}$$

3. Transactions have at least 2 effects

4. Transactions always conform to one of 4 patterns

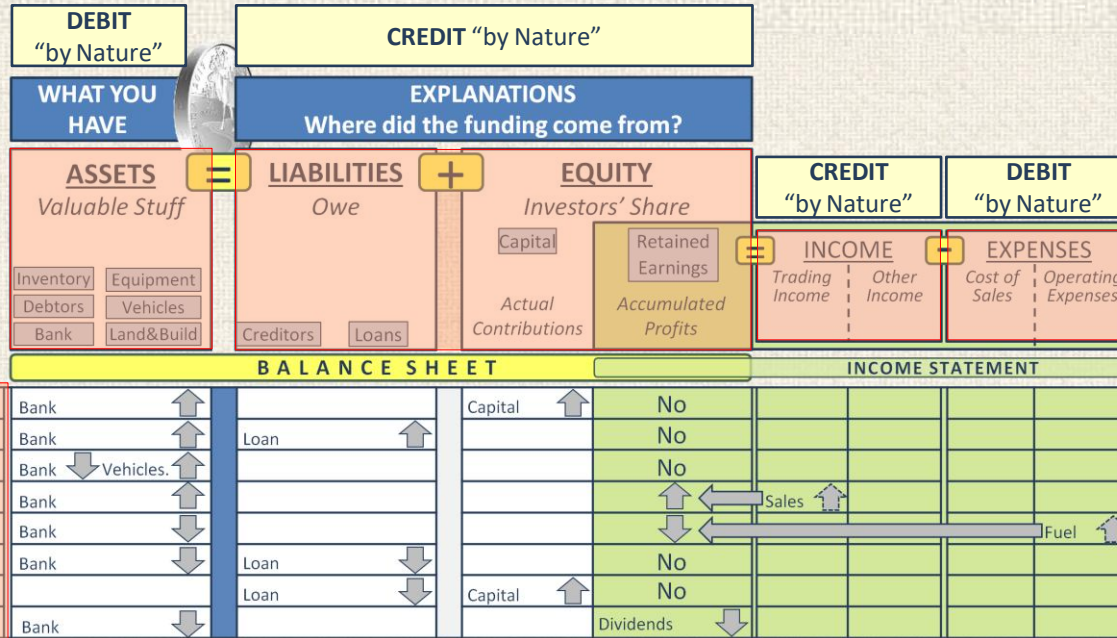

5. There will ALWAYS be a common-sense way to place the 2+ effects of every single financial transaction, into 1 or more of the 5 containers, with the unavoidable outcome that the 2 sides remain equal

"So how does the Debits and Credits System work?"

The Debits and Credits System

Key Learnings

1. The FIVE ELEMENTS of Accounting

Assets, Liabilities, Equity, Income, Expenses

2. Three equations explain how these elements relate to each other:

$$\text{Assets} = \text{Liabilities} + \text{Equity}$$

$$\text{Equity} = \text{Capital} + \text{Profit}$$

$$\text{Profit} = \text{Income} - \text{Expenses}$$

3. Transactions have at least 2 effects

4. Transactions always conform to one of 4 patterns

5. There will ALWAYS be a common-sense way to place the 2+ effects of every single financial transaction, into 1 or more of the 5 containers, with the unavoidable outcome that the 2 sides remain equal

1 All Accounts are **DEBIT** or **CREDIT** "by Nature"

2 A Transaction is ALWAYS made up of at least one **DEBIT** and one **CREDIT** "effect"

Then a **SAME** Nature & Effect: value goes **UP**

b **OPPOSITE** Nature & Effect: value goes **DOWN**

"So how does the Debits and Credits System work?"

Business Activities

	SETTING THINGS UP
1	Obtain some Equity funding for the business
2	Obtain some Debt funding
3	Buy an asset for cash (any asset)
4	Buy an asset on credit (any asset)
	DAY-TO-DAY ACTIVITIES
5	Cash purchase (not an asset)
6	Credit purchase (not an asset)
7	Cash sale (service item; no inventory)
8	Cash sale (inventory item)
9	Credit sale (service item; no inventory)
10	We pay the creditor from (6)
11	The debtor from (9) makes a payment
12	Take deposit from a customer for a special order stock item
13	Pay a supplier up front for the special order item for the customer
14	The supplier delivers the special order item to us
15	Our customer collects the special order item
16	A customer returns something
17	We return something to a supplier for credit

	MONTHLY-TYPE ACTIVITIES
18	Interest on loans
19	Depreciation / Amortisation
20	Expense accruals (know cost amount that will be charged by supplier but you have not yet received the invoice) and provisions (cost amount is unknown so you have to estimate)
21	Loan repayment
	LESS OFTEN / ANNUAL
22	Debt / equity swaps
23	Dividends (declared and paid in cash)
24	Dividends (declared but not paid out)
25	Disposal of a Fixed (Non-Current) Asset (at book value)
26	Disposal of a Fixed (Non-Current) Asset (at a profit)
27	Disposal of a Fixed (Non-Current) Asset (at a loss)
	OTHER
28	VAT on purchases
29	VAT on sales
30	Paying VAT owed to SARS
